

Jamil Guliyev

Overview

What is my professional aspiration?

Snapshot of last [N] months:

- Associate since [Month Year] on PASHA Real Estate, building an AI-enabled end-to-end procurement and tendering platform, in a [team setup, e.g. "EM + Associate + BA"] setup

What are my goals at the Firm for the next 6–18 months?

- Build on my experience taking PASHA Real Estate's procurement platform from raw data to deployed tools, and continue stepping up on broader leadership responsibilities, moving towards [next milestone, e.g. "consistently operating at EM level"]
- Deepen expertise in AI- and data-driven transformation in real estate and construction to become a go-to resource for the office on the topic
- Take a more structured role in coaching junior colleagues and contributing to recruiting and office building

What excites me?

- Moving work from strategy and planning into implementation and tools that clients actually use
- Building trusted thought-partner relationships with senior clients
- Using AI agents to change how fast and how deep consulting work can go, and bringing colleagues and clients along

What are my strengths?

- Manages Work/Projects: Owns delivery end to end, from data foundation to tools deployed on client servers, keeping construction teams on site and leadership aligned
- Solves Problems: Turns large, messy operational data into working AI and analytics products, from data engineering and architecture through to forecasting algorithms
- Counsels Clients / Builds Relationships: Works across the full client organization, from construction teams on site to the C-suite, incl. bi-weekly steering committees with the CEO of PASHA Real Estate Group
- Communicates Effectively: Translates complex data and AI work into clear, decision-ready outputs for senior audiences

What office/Firm contributions energize me the most?

- Supporting recruiting and coaching candidates, helping attract strong talent to the Azerbaijan and Türkiye offices
- Building AI capabilities across the Firm and with clients as AI Black Belt faculty and trainer

How have I contributed to strengthening our Firm this year?

As I Work Toward My Aspiration And Reflect On Previous Development Conversations, How Am I Developing The Relevant Skills And Growing?

Solves Problems

PASHA Real Estate – AI-enabled end-to-end procurement and tendering platform:

- Tackled a core client pain point: procurement ran on unstructured Excel files, each project worked its own way, and construction and development teams had no shared structure or knowledge base and did not exchange information
- Analyzed 350+ procurement packages across all PASHA Real Estate projects and built a unified, canonical item library of 1.5M+ construction item records, using AI agents end to end to parse the data, design and build the database, and refine quality in a medallion (bronze/silver/gold) architecture; this replaced an estimated 2+ person-years of manual effort (downloading the packages alone took ~2 weeks) and created the first shared cost knowledge base across construction and development
- Ran a 2-week structured review of the item library with middle and senior construction managers, collecting 7,000+ review inputs; this lifted library accuracy from the low 60s to the high 90s (%) and led to a redesigned mapping mechanism that matches items on their detailed specifications instead of item to item
- Built a CapEx forecasting algorithm for future buildings on the gold data layer, enriched with commodity price indexes, piloted on \$10M+ of procurement packages and currently landing within ~5% of the client's own estimates; this gives the client an independent, data-driven benchmark for budgeting and is set to scale to the full portfolio ([Mn CapEx in scope])

Manages Work/Projects

PASHA Real Estate – AI-enabled end-to-end procurement and tendering platform:

- As Associate, owned the platform build from data foundation to deployed tools, working in close collaboration with the procurement department and with construction teams on site, incl. regular site visits; this grounded the platform in how packages are actually scoped, priced and tendered
- Designed and deployed, with AI agents, user interfaces on the client's own servers, incl. the review tool for the item library, so client teams could easily access and test the MVP; this brought the client into the build early and turned their expertise into direct improvements to the algorithm

Counsels Clients

- Work closely with the Chief Construction Officer and Chief Development Officer of PASHA Real Estate as thought partner on the platform, while staying connected to construction teams on the ground; this kept the solution anchored in both leadership priorities and site-level reality
- Coordinated client outreach and invitations for the Firm's AI and Data Summit in Paris, engaging [N] senior leaders to secure names and invitations for [N] clients; this [outcome, e.g. "brought N senior clients from the region to the Summit and deepened Firm relationships with them"]

Communicates Effectively

- Present outputs to the CEO of PASHA Real Estate Group at bi-weekly steering committees, translating data engineering, accuracy and forecasting results into decisions for leadership; this secured alignment on taking the platform from pilot to a turnkey solution

Builds Client Capabilities

- Coached the client's data counterpart, who supports the team on data retrieval, on how to collaborate effectively with consultants and how to feed better into his own team; this sped up and improved the quality of data inputs to the project and strengthened his role as the bridge between the project and his team
- Delivered an AI training to SOCAR Upstream middle management, covering what AI is, how it can optimize their day-to-day work, and which tools are already available to them; this built a practical foundation for AI adoption at the client and positioned the Firm as a thought partner on AI

Demonstrates Entrepreneurship

- Shaping the next phase at PASHA Real Estate: scaling the item library and forecasting to all construction projects as a turnkey solution released to the client, then expanding into tender evaluation, where a unified library and forecasts allow like-for-like comparison of bidders; this extends the work from a pilot into the client's core procurement process

Builds Expertise

- Built hands-on expertise in AI-agent-driven delivery, from data parsing and medallion architecture to forecasting and deploying UIs on client servers, and brought it back to the Firm as faculty for the AI Black Belt training for BAs and Associates; will next deliver the same program to EMs, Associate Partners and Partners, helping scale practical AI fluency across all tenure levels

Enriches Firm Talent

- Led the office recruiting event for ~40 prospective candidates for the Azerbaijan and Türkiye offices, joining from across the world, by running a live demo case and coaching participants on how to structure and approach it; this strengthened the candidate pipeline and gave candidates a clear view of what the Firm looks for
- [If applicable: Supported recruiting through N+ HR screening / Round 1 interviews]

Apprentices Others

- Coaching a fellow BA on the PASHA Real Estate team, building out her overall toolkit, empowering her to build her own client relationships, and introducing her to deeper technology concepts; this [outcome, e.g. "she now independently leads client sessions on X"]

Upholds Values

- Built the office per-diem compliance report and run it every two months, reconciling direct billing and Wolt data against the 150 AZN per-diem limit and flagging colleagues who exceed it, who then receive a notification; this gives the office early visibility on overspend and lets it be corrected before audit, reinforcing adherence to Firm expense policy

Who are my mentors/sponsors at the Firm?

[List as "First name + last initial", e.g. "Sinan K., Murat G., ..."]

Looking Ahead

[Development dimension 1, e.g. Apprentices Others]

- [What you want to build and how, e.g. "Coach junior colleagues in a structured way within the project, practicing how I structure and delegate tasks and adapt to different working styles"]

[Development dimension 2, e.g. Demonstrates Entrepreneurship]

- [e.g. "Play a more active role in shaping new opportunities with existing clients, moving from supporting LOPs to leading the problem definition"]

What support do I need from my mentors/sponsors and the Firm?

- [e.g. "Feedback on how to strengthen my leadership style as I take on more EM-level responsibilities"]
- [e.g. "Staffing on a project with a larger team / in a new industry or geography"]

Will this plan give me energy and how can I make it sustainable for me, both personally and professionally?

Yes. [Why it energizes you, e.g. "The work combines leadership, visible client impact, problem solving and colleague development."] [How you keep it sustainable, e.g. "I will proactively schedule 1-1s with my mentors and protect time to re-energize."]

[Optional] Additional Considerations

What are the top 3 topics, if any, I would like to discuss with my DGL?

- [Topic 1, e.g. "What should I focus on to be ready for the next tenure milestone"]
- [Topic 2]
- [Topic 3]
