

Jamil Guliyev

Overview

What is my professional aspiration?

Snapshot of last 6 months:

- PASHA Bank (April–July 2026): led the Commercial & SME, Private Banking, and Tech & AI streams of the bank's strategy, in a 1 EM + 1 JEM + 1 Associate + 1 BA + 2 C&I specialists setup
- PASHA Real Estate (July 2026–ongoing): AI Champions Program, responsible for data processing, the unified item library, client alignment and CAPEX estimation, in a 1 EM + 1 Associate + 1 BA + 1 QuantumBlack data scientist setup

What are my goals at the Firm for the next 6–18 months?

- Build on leading multiple streams at PASHA Bank and PASHA Real Estate and continue stepping up towards [next milestone, e.g. "consistently operating at EM level"]
- Deepen expertise in AI-driven transformation, from strategy and value sizing to deployed solutions, and become a go-to resource for the office
- Take a more structured role in coaching junior colleagues and contributing to recruiting and office building

What excites me?

- Moving work from strategy into tools that clients actually use
- Building trusted thought-partner relationships with senior clients
- Using AI agents to change how fast and how deep consulting work can go, and bringing colleagues and clients along

What are my strengths?

- Solves Problems: Combines strategy and value sizing with hands-on AI and data engineering
- Manages Work/Projects: Leads several streams in parallel and owns delivery end to end
- Counsels Clients / Builds Relationships: Works across the full client organization, from construction teams on site to the C-suite
- Communicates Effectively: Translates complex data and AI work into decision-ready outputs for the C-suite

What office/Firm contributions energize me the most?

- Supporting recruiting and coaching candidates for the Azerbaijan and Türkiye offices
- Building AI capabilities across the Firm and with clients as AI Black Belt faculty and trainer

How have I contributed to strengthening our Firm this year?

As I Work Toward My Aspiration And Reflect On Previous Development Conversations, How Am I Developing The Relevant Skills And Growing?

Solves Problems

PASHA Bank – bank strategy:

- Developed the Commercial & SME strategy of 6 initiatives and 3 enablers (e.g. B2B ecosystem, dormant client reactivation, agentic AI underwriting), worth ~AZN 60 Mn additional net banking income; this gave leadership a quantified path to AZN 121 Mn NBI by 2029
- Sized the private banking market bottom-up at ~6.2k individuals and set a ~1,250-client target (~30% share by 2029) via CIB relationships, worth AZN ~39 Mn NBI potential, with a segmentation reset at USD 250K+ AUM; this refocused Private Banking on truly wealthy clients
- Led the Tech & AI diagnostic, benchmarking AI maturity against 200+ banks and assessing IT demand, engineering and architecture, and sized AI value at AZN 32–60 Mn (13–24% of pre-tax profit); this gave leadership five priority actions to move from isolated AI wins to enterprise scale

PASHA Real Estate – AI Champions Program:

- Replaced unstructured, project-by-project Excel files with PRE's first shared cost knowledge base: built AI agents to unify 353 awarded procurement packages from 2023–2026 (USD 550–700 Mn), 284 with item-level prices, into a 1.5M+ record database; this replaced an estimated 2+ person-years of manual work
- Ran a 2-week review of the item library with construction managers, collecting 7,000+ inputs; this lifted accuracy from the low 60s to the high 90s (%) and led to a new specification-based mapping mechanism

- Built a CAPEX estimation solution forecasting at three levels of design detail from historical bids and commodity price drivers; piloted on a live \$10M+ MEP tender, it landed within ~5% of the client's own estimates and is set to scale to the full USD 550–700 Mn portfolio

Manages Work/Projects

- PASHA Bank: led three strategy streams in parallel, working closely with the bank's strategy and finance teams on data and hypotheses; this brought all three to final leadership documents within the 3-month engagement
- PASHA Real Estate: owned the data-to-estimate chain end to end (data processing, item library, CAPEX estimation) and deployed review interfaces on the client's servers; this let client teams test and shape the MVP early
- Led client alignment with procurement and construction teams on site, incl. a cross-functional task force to validate the data; this grounded the solution in how packages are actually scoped, priced and tendered

Counsels Clients

- PASHA Bank: interviewed managing directors, directors and C-suite leaders (e.g. COO, Chief Security Officer) to shape strategic priorities and Tech & AI ambition; this grounded the recommendations in leadership's own view
- PASHA Real Estate: worked closely with the Chief Construction Officer and Chief Development Officer as thought partner; this kept the solution anchored in both leadership priorities and site-level reality
- Coordinated client nominations for the Firm's AI and Data Summit in Paris, collecting input from 13 Firm leaders to submit 49 clients from 26 distinct organizations; this gave the Firm a broad, senior client list from the region for one of its flagship AI events

Communicates Effectively

- Presented to the CEO and C-suite of PASHA Bank weekly; this kept bank leadership closely engaged in shaping the strategy
- Presented to the CEO of PASHA Real Estate Group at bi-weekly steering committees with live demos; this secured alignment on moving from pilot to a turnkey solution

Builds Client Capabilities

- Coached PASHA Real Estate's data counterpart on how to work effectively with consultants and feed better into his own team; this improved the speed and quality of data inputs to the project
- Delivered an AI training to SOCAR Upstream middle management on how AI and their existing tools can optimize daily work; this built a practical foundation for AI adoption

Demonstrates Entrepreneurship

- Shaped the next phase at PASHA Real Estate: a turnkey solution scaled to all construction projects, then tender bid evaluation, where the unified library and forecasts allow like-for-like comparison of bidders; this extends the work from a pilot into PRE's core procurement process

Builds Expertise

- Built hands-on expertise in AI-agent-driven delivery, from data extraction to forecasting and deployed applications, and brought it back to the Firm as faculty for the AI Black Belt training for BAs and Associates; next delivering it to EMs, Associate Partners and Partners

Enriches Firm Talent

- Led the office recruiting event for ~40 candidates for the Azerbaijan and Türkiye offices, running a live demo case and coaching participants on case approach; this strengthened the candidate pipeline

Apprentices Others

- Actively coached the fellow BA at PASHA Real Estate on her toolkit, client relationships and deeper technology concepts; this broadened her development beyond core analytics

Upholds Values

- Built the office per-diem compliance report, run every two months, reconciling direct billing and Wolt data against the 150 AZN limit and flagging overspend; this lets the office correct issues before audit

Who are my mentors/sponsors at the Firm?

[List as "First name + last initial", e.g. "Sinan K., Murat G., ..."]

Looking Ahead

Apprentices Others

- Move from informal coaching to formally managing BAs: structuring and delegating their work, setting clear expectations and giving regular feedback, as my next step towards EM responsibilities

Counsels Clients / Demonstrates Entrepreneurship

- Contribute actively to client development and proposals with Partners and EMs, e.g. bringing the PASHA Real Estate data-to-CAPEX approach to other PASHA Group companies and real estate clients, and use my C-suite relationships to spot where the Firm can help next

What support do I need from my mentors/sponsors and the Firm?

- Staffing where I can directly manage a BA
- Involvement in client development and proposal work alongside Partners and EMs
- Feedback on my leadership style as I take on more EM-level responsibilities

Will this plan give me energy and how can I make it sustainable for me, both personally and professionally?

Yes. The plan combines what gives me the most energy: building AI solutions clients actually use, working with senior clients and developing colleagues. To keep it sustainable, I will proactively schedule regular 1-1s with my mentors and protect time to re-energize between intense delivery phases.

[Optional] Additional Considerations

What are the top 3 topics, if any, I would like to discuss with my DGL?

- What I need to demonstrate to [next milestone, e.g. "operate at EM level"]
- How to get involved in client development and proposals in the coming months
- Staffing options that let me manage a BA directly
