

Jamil Guliyev

Overview

What is my professional aspiration?

Snapshot of last 6 months:

- PASHA Bank (April–July 2026): led the Commercial & SME, Private Banking, and Tech & AI streams of the bank's strategy
- PASHA Real Estate (July 2026–ongoing): Associate on the AI Champions Program, responsible for data parsing and processing, the unified item library, client alignment and CAPEX estimation, in a [team setup, e.g. "EM + Associate + BA"] setup

What are my goals at the Firm for the next 6–18 months?

- Build on leading multiple streams at PASHA Bank and taking PASHA Real Estate's procurement data from unstructured Excel files to a unified library and CAPEX estimates, and continue stepping up towards [next milestone, e.g. "consistently operating at EM level"]
- Deepen expertise in AI-driven transformation, from strategy and value sizing through to building and deploying solutions, and become a go-to resource for the office on the topic
- Take a more structured role in coaching junior colleagues and contributing to recruiting and office building

What excites me?

- Moving work from strategy into tools that clients actually use
- Building trusted thought-partner relationships with senior clients
- Using AI agents to change how fast and how deep consulting work can go, and bringing colleagues and clients along

What are my strengths?

- Solves Problems: Combines strategy and value sizing with hands-on AI and data engineering, from market sizing and business cases to forecasting algorithms
- Manages Work/Projects: Leads several streams in parallel and owns delivery end to end, from data foundation to tools deployed on client servers
- Counsels Clients / Builds Relationships: Works across the full client organization, from construction teams on site to the C-suite
- Communicates Effectively: Translates complex data and AI work into clear, decision-ready outputs for senior audiences

What office/Firm contributions energize me the most?

- Supporting recruiting and coaching candidates for the Azerbaijan and Türkiye offices
- Building AI capabilities across the Firm and with clients as AI Black Belt faculty and trainer

How have I contributed to strengthening our Firm this year?

As I Work Toward My Aspiration And Reflect On Previous Development Conversations, How Am I Developing The Relevant Skills And Growing?

Solves Problems

PASHA Bank – bank strategy:

- Developed the Commercial & SME strategy of 6 initiatives and 3 enablers (incl. a transaction-banking-led B2B ecosystem, dormant client reactivation and an agentic AI underwriting revamp), sized at ~AZN 60 Mn additional net banking income; this gave leadership a quantified path to AZN 121 Mn NBI by 2029 for a segment trailing CIB on profitability
- Sized the private banking market bottom-up at ~6.2k eligible individuals and set a fair-share target of ~1,250 clients (~30% share by 2029) through existing CIB relationships, with a segmentation reset at USD 250K+ AUM and AZN ~39 Mn NBI potential; this refocused Private Banking on truly wealthy clients and high-touch coverage
- Led the Tech & AI diagnostic, benchmarking AI maturity against 200+ banks and assessing demand management, engineering practices and architecture, and estimated AI value potential at AZN 32–60 Mn (13–24% of pre-tax profit) across 10 value streams; this gave leadership a fact base and five priority actions to move from isolated AI wins to enterprise scale

PASHA Real Estate – AI Champions Program:

- Addressed a core pain point: procurement ran on unstructured Excel files, each project worked its own way, and construction and development teams shared no common structure or knowledge base
- Built AI agents to extract, clean and unify data from 353 awarded procurement packages from 2023–2026 (USD 550–700 Mn equivalent), capturing 284 (80%) with item-level prices in a 1.5M+ record medallion-architecture database; this replaced an estimated 2+ person-years of manual work and created PRE's first shared cost knowledge base
- Ran a 2-week review of the unified item library with middle and senior construction managers, collecting 7,000+ inputs; this lifted accuracy from the low 60s to the high 90s (%) and led to a new mapping mechanism that matches items on detailed specifications
- Built a CAPEX estimation solution with forecasts at three levels of detail (project brief, concept design and technical design), combining historical bids with commodity price drivers; piloted on a live MEP tender of \$10M+, it landed within ~5% of the client's own estimates and is set to scale to the full USD 550–700 Mn portfolio

Manages Work/Projects

- PASHA Bank: led three strategy streams in parallel, [managing N BAs / working with N client counterparts], and delivered them as summary documents for bank leadership in June 2026; this [outcome, e.g. "kept all three streams on the same timeline and story"]
- PASHA Real Estate: owned the data-to-estimate chain of the AI Champions Program end to end (data parsing and processing, unified item library and CAPEX estimation) and deployed review interfaces on the client's servers so teams could test the MVP early; this gave the program's other solutions a reliable data foundation to build on
- Led client alignment on the library and estimates, working closely with procurement and with construction teams on site and setting up a cross-functional task force (construction, development, procurement) to validate the data; this grounded the solution in how packages are actually scoped, priced and tendered

Counsels Clients

- PASHA Bank: engaged senior leaders, incl. the COO, Chief Security Officer, Head of Data Science and MD of IT Operations, to define the bank's Tech & AI ambition and priorities; this [outcome]
- PASHA Real Estate: worked closely with the Chief Construction Officer and Chief Development Officer as thought partner on the item library and CAPEX estimates; this kept the solution anchored in both leadership priorities and site-level reality
- Coordinated client outreach and invitations for the Firm's AI and Data Summit in Paris, engaging [N] senior leaders to secure invitations for [N] clients; this [outcome]

Communicates Effectively

- Presented PASHA Real Estate progress to the CEO of PASHA Real Estate Group at bi-weekly steering committees, using live demos of the platform; this secured alignment on moving from pilot to a turnkey solution
- [PASHA Bank: presented strategy and Tech & AI results to the CEO / Management Board; this ...]

Builds Client Capabilities

- Coached PASHA Real Estate's data counterpart on how to work effectively with consultants and feed better into his own team; this improved the speed and quality of data inputs to the project
- Delivered an AI training to SOCAR Upstream middle management on what AI is, how it can optimize their daily work and which tools they already have; this built a practical foundation for AI adoption at the client

Demonstrates Entrepreneurship

- Shaped the next phase at PASHA Real Estate: scaling the item library and CAPEX estimation to all construction projects as a turnkey solution, then expanding into tender bid evaluation, where a unified library and forecasts allow like-for-like comparison of bidders; this extended the work from a pilot into PRE's core procurement process

Builds Expertise

- Built hands-on expertise in AI-agent-driven delivery, from data extraction and architecture to forecasting and deployed applications, and brought it back to the Firm as faculty for the AI Black Belt training for BAs and Associates; next delivering the program to EMs, Associate Partners and Partners

Enriches Firm Talent

- Led the office recruiting event for ~40 prospective candidates for the Azerbaijan and Türkiye offices, running a live demo case and coaching participants on how to structure and approach it; this strengthened the candidate pipeline and showed candidates what the Firm looks for
- [If applicable: Supported recruiting through N+ HR screening / Round 1 interviews]

Apprentices Others

- Coached a fellow BA on the PASHA Real Estate team, building out her toolkit, helping her build her own client relationships and introducing her to deeper technology concepts; this [outcome, e.g. "she now independently leads client sessions on X"]

Upholds Values

- Built the office per-diem compliance report and ran it every two months, reconciling direct billing and Wolt data against the 150 AZN limit and flagging colleagues who exceed it; this gives the office early visibility on overspend before audit and reinforces Firm expense policy

Who are my mentors/sponsors at the Firm?

[List as "First name + last initial", e.g. "Sinan K., Murat G., ..."]

Looking Ahead

[Development dimension 1, e.g. Apprentices Others]

- [What you want to build and how, e.g. "Coach junior colleagues in a structured way within the project, practicing how I structure and delegate tasks and adapt to different working styles"]

[Development dimension 2, e.g. Demonstrates Entrepreneurship]

- [e.g. "Play a more active role in shaping new opportunities with existing clients, moving from supporting LOPs to leading the problem definition"]

What support do I need from my mentors/sponsors and the Firm?

- [e.g. "Feedback on how to strengthen my leadership style as I take on more EM-level responsibilities"]
- [e.g. "Staffing on a project with a larger team / in a new industry or geography"]

Will this plan give me energy and how can I make it sustainable for me, both personally and professionally?

Yes. [Why it energizes you, e.g. "The work combines leadership, visible client impact, problem solving and colleague development."] [How you keep it sustainable, e.g. "I will proactively schedule 1-1s with my mentors and protect time to re-energize."]

[Optional] Additional Considerations

What are the top 3 topics, if any, I would like to discuss with my DGL?

- [Topic 1, e.g. "What should I focus on to be ready for the next tenure milestone"]
- [Topic 2]
- [Topic 3]
